The March was once considered the last month of the year where it was considered safe to brew a lager beer before the summer heat followed.) Already at pouring pierces the amber eye, the subtle hop oils unfold and give the beer its pleasant note. As first beer pub in Austria, we offer this dark specialty on tap.

The hardness of the Munich water was a blessing for this beer. Because sooner they only brewed with water and not, as today, with soft deep water. Dark beer was valid until the end of the 19th century as the noblest of them all. And because the Munich have always been connoisseurs, they drank no other.

Unbroken overwhelming remain the characteristic roasted-malt-aroma, intense and silky on the palate. Chocolate and liquorice rise slightly sweet - very typical of this beer style. Hops are noticeable only subtly

BIER-SCHNITT – half and half

138 km separate the Paulaner brewery in Munich and Stiegl brewery in Salzburg each other. We bridge the gap in a few moments and unite, the Stiegl Goldbräu with the Paulaner Munich Dunkel in a glass to a wonderful beer section.
